

Is your dental IT system benefitting your practice and patients? With medical costs on the rise, and continuing healthcare reforms, maintaining a current computer system can be a challenge. To respond to these unprecedented changes and deliver superior dental care means using knowledge and technology in new ways—from the back office to the doctor’s office. To help our dentists deliver more effective, efficient and affordable healthcare, we have created the **Dental IT Plan**.

C&C Networks’ Dental IT Plan helps local and leading dental care providers achieve:

- Reduced administrative costs.
- Reduction in healthcare costs.
- Efficiency in capturing and organizing notes and the distribution of data.
- Optimized servers, computers, x-ray imaging hardware, and wireless devices.
- Linking of multiple locations seamlessly.
- Integration and implementation of EMR/EHR requirements.
