
Rapid Cost Reduction for K-12

C&C Networks has put together an IT service and support program (Rapid Cost Reduction) allowing many local school districts and catholic/religious organizations an opportunity to achieve savings in the thousands of dollars. This successful program has contributed significantly to each school and religious organization's ability to continue offering the excellent service and support necessary for student and individual success.

C&C Networks teams with educational institutions around the country to design and deploy cost effective technology support solutions.

With a widespread economic downturn, many top leaders of educational institutions are prioritizing cost reduction as never before-seeking new solutions and proven practices. Many cost saving ventures exist, our goal is to explore and deploy each and every one.

The major areas we focus on are:

- System Infrastructure
- Networking Technology
- Application modernization and optimization
- Data backups
- Overall complete system and data security
- Rapid cost reduction

Primary and secondary educational institutions are searching for new methods to meet expectations of parents, students, teachers, and administrators while facing the urgent need to reduce costs. C&C Networks wide range of services help educational institutions implement structural and sustainable changes that reduce overall IT support costs, administrative costs, while improving efficiencies and optimizing revenue.
